

Annual training - Electrically instructed Person (Online/Inhouse)

Your obligation to instruct

According to the German "Arbeitsschutzgesetz (ArbSchG)" and "DGUV-Vorschrift 1" employers are obligated to instruct their employees at least once a year. This instruction must contain all identifiable operational hazards and required protective measures to prevent these hazards.

Electrically instructed persons (EiPs) must be instructed at least once a year.

Dates for an instruction

Upon your individual request, we will be happy to provide you with a specific offer. Even short-term requests in urgent cases can usually be implemented.

Content of our instruction

- Legal Basis
- Norms
- Electrical qualification level
- Electrical organisation
- Principles of electrical engineering
- Hazards of electrical current
- Preventive measures
- Behaviour in case of electrical accidents
- Statistics
- Examples of electrical accidents

This instruction does not replace a practical on-site plant instruction.

The contents are adapted to your requirements / peculiarities of the plants, regardless of whether the participants work onshore or offshore.

Each participant will be issued an individual certificate for this annual instruction.

Duration and language of our instruction

The duration of the instruction is approx. 2 - 3 hours. The instruction can be given in German as well as in English.

Instructing expert (Name: Malte Schumacher)

Our expert is a trained and studied electrical expert. In addition to his training as an electronics technician for industrial engineering, he completed a bachelor's degree in electrical energy systems engineering.

Our expert has several years of experience in the commissioning of substations and switchgears and is therefore very familiar with the field of high and medium voltage.

We can also draw on experience in the field of grid operation due to several years of professional experience with an energy supplier. Concepts such as NPCI, NPCW, etc. can thus be conveyed in detail.

Our expert also has several years of offshore experience.

Price overview for our annual training - Electrically skilled Person (Online/Inhouse)

Position	Price [€] *
EuP instruction for one participant - Updating of the instruction documents to your needs - Updating of the instruction documents with accident examples - Implementation of the instruction seminar - Documentation and provision of proof of participation and certificate - Sensitization for the prevention of accidents	500,00
for each additional participant	200,00
Hotel accommodation in case of in-house training	110,00
Travel expenses (arrival + departure)	850,00

*plus 19% tax
